Weather	Cloudy with a north North-easterly wind. Water very coloured

Saturday 15th November was the second match of the Junior Jurassic League, after the heavy rain on Friday, Saturday though cloudy the rain stayed away . The wind was chilly north-north easterly.

The first fish fell to Lille-Rose Clarke just after the start of the match a 26g Whiting, in all 11 different species were caught: Whiting, Shanny, Pout, Tompot Blenny, Bass, Shore Rockling, Flounder, Sole, Silver Eel, Weever & Black Bream. One very notable catch was by new club member George Graff who landed a beautiful Dover Sole of 500grams.

As ever, none of this would be possible without the support of Tom Marley at Angling centre west bay, Richard Tiny Daw and Norman Stokes who kept everyone baited up and tangle free. Huge thanks to you all and we look forward to seeing you all again on 6th December for the last junior match of 2025 12-3 on the East Pier.
