6 juniors signed on to fish in cold but calm conditions.
The fishing was varied and good with 129 fish caught species included Tompot, Shanny, Lesser Weever, Whiting, Bass, Smelt, Pollack, Corkwing and Ballan Wrasse.
Thanks as ever to Tom Marley at the Angling Centre, Norman Stokes and Richard Tiny Daw for all their help without which none of this would be possible-initially I was hoping for more anglers but to be fair with the number of fish about we would have struggled with any more this time! It was good to see so many sizeable fish and a few prawns that we managed to catch went home with them to make the odd fish pie.

Quin with one of her many Whiting. She has learnt the old anglers trick of holding the fish closer to the camera to make it look bigger
